

Create a one-page personal portfolio website using HTML and CSS.

Use a clean, modern, and responsive design with a blue and white color scheme.

Include the following sections:

Home:

- Display the name "Mico F. Grande"
- Add a headline: "Aspiring Tech Enthusiast and ABM Student"
- Include a short introduction: "I am passionate about technology, learning, and problem-solving."

About Me:

- Write a paragraph about Mico F. Grande who is a student from Davao City.
- Mention that he is currently studying ABM (Accountancy, Business, and Management).
- Highlight his interest in technology, programming, and analytical thinking.
- Mention that he enjoys playing games and listening to music.

Skills:

- List skills such as:
 - Basic Programming (Python, Java)
 - Problem Solving
 - Analytical Thinking
 - Communication

Projects:

- Include a project titled "Simple Payroll System"
 - Description: A program that performs basic calculations and handles payroll-related computations.
- Include a project titled "Calculator Program"
 - Description: A program that performs basic arithmetic operations such as addition, subtraction, multiplication, and division.

Contact:

- Add a placeholder email (example: mico@example.com)
- Add a simple contact form (name, email, message)

Additional requirements:

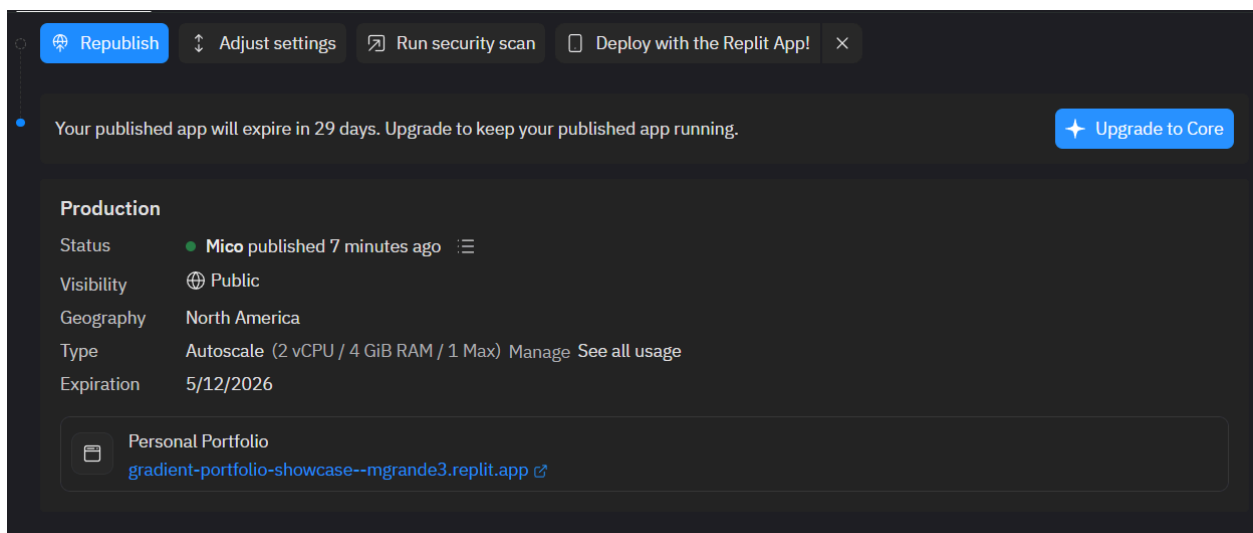

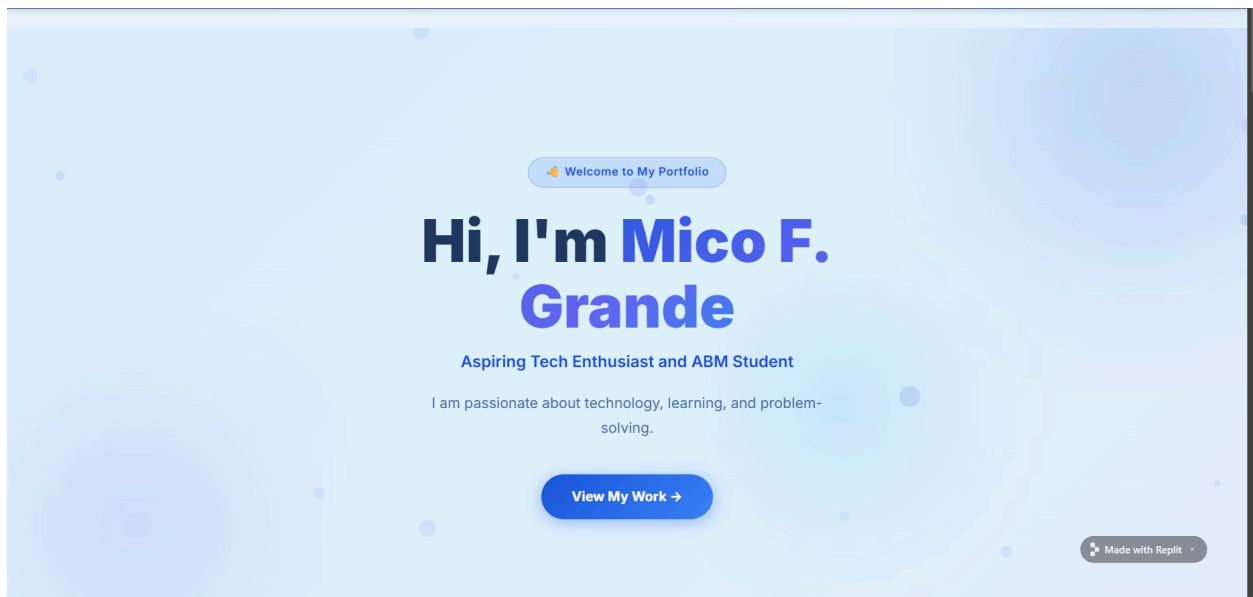

- Add a navigation bar with smooth scrolling
- Include a hero section with a call-to-action button
- Make it mobile responsive
- Add hover effects for buttons
- Use clean spacing and modern fonts

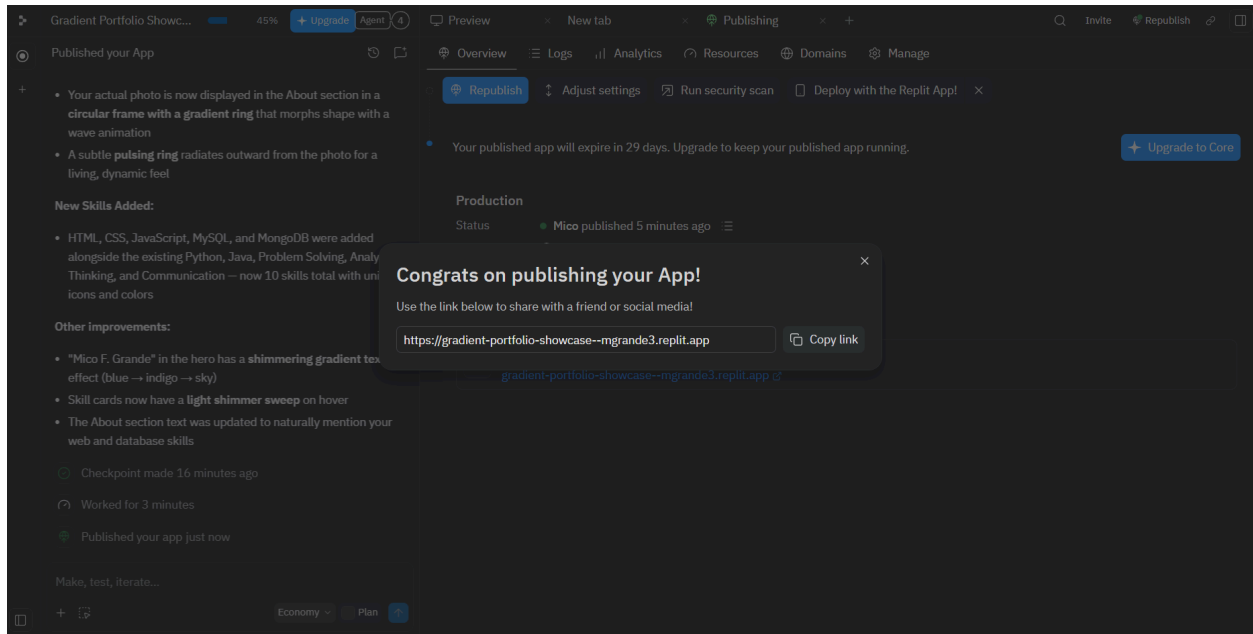

PROMPT 2 (Improvement)

Add a navigation bar with smooth scrolling to each section.
Improve spacing, alignment, and font styles to make it look more professional.

PROMPT 3 (Improvement)

Add a hero section with a headline, short introduction, and a call-to-action button.
Make the layout mobile responsive and add simple hover effects for buttons.

✨ Reflection

What worked well?

The AI generated a complete website structure quickly, which made it easier to start. The design was already clean and organized.

What needed manual fixing?

Some text and sections needed editing to match my personal information. I also adjusted spacing and wording to improve clarity.

What did you learn about prompting?

I learned that clear and specific prompts produce better results. Adding refinement prompts helps improve design, layout, and responsiveness step by step.
